

chicago transit authority

*CTA is the 2nd largest transit agency in the United States. In the early 2000's CTA implemented a new ERP solution, based on the Oracle's e-Business Suite platform, and replaced the old legacy GEAC solution.*

## CHALLENGES/OPPORTUNITIES

- Integration of external custom solutions with Oracle e-Business
- Consolidate disparate systems into a universal system of record.
- Improve the business process flows
- Upgrade and maintain legacy systems as a contingency plan for payroll
- Buy in from business users and team on newer technology.

## SOLUTIONS

- Applications implemented over time:
  - Oracle Financials, Purchasing
  - Oracle HR, Self-service, Payroll
  - Upgrade GEAC system and maintenance of custom legacy applications

## RESULTS

- Extended the Oracle Application Suite to integrate the bus and rail operations for GTO process, Wage Rate/Wage Progression, FAST system.
- Upgraded the GEAC HR/Payroll system utilized to run payroll until Oracle e-Business became the system of record.
- CTA can now:
  - Have a common platform and consolidation of multiple systems
  - Run payroll off of the Oracle e-Business system via interface from GEAC.
